Inactive Hazardous Sites Program

Report to the
North Carolina General Assembly

October 2001

Superfund Section
Division of Waste Management
Department of Environment and Natural Resources
1646 Mail Service Center
Raleigh, North Carolina 27699-1646

EXECUTIVE SUMMARY

The Inactive Hazardous Sites Program was created by the North Carolina General Assembly to identify, control and correct properties contaminated with hazardous substances.

To date, ~~4,130~~ 1,139 spill and disposal sites and 779 old, unlined dumps or landfills have been catalogued. 109 of the 779 unlined dumps or landfills are at catalogued spill and disposal sites. In most cases, the locations of the landfills are still being determined. The Inactive Hazardous Sites Branch is currently supervising a contract to locate these landfills, collect information on property use, and determine the potential for exposure. Based on observations at sites investigated thus far, most of North Carolina's unlined landfills can be expected to have groundwater contamination. There is also a high probability that many will have residences or private wells on or adjacent to the landfill.

The branch has a five person staff. To increase efficiency without additional appropriations, the General Assembly authorized the use of branch-approved private environmental consulting firms to certify lower priority voluntary party cleanup actions. Called Registered Environmental Consultants or RECs, these private overseers are working on 28 sites. At present, 60 firms have received REC status.

Figure ES-1, on the following page, shows both the number of sites catalogued by the program and the number where all work is now complete. The following Figure ES-2 shows how the number of sites addressed by the program has grown over time.

Sites Identified

Chemical spills and disposal	4,130	<u>1,139</u>
Old unlined dumps and landfills <u>not in main inventory</u>	<u>779</u>	<u>670</u>
Total	<u>1,909</u>	<u>1,809</u>

Sites With All Work Complete

Since last status report in 11/00	12
Previous site completions	<u>388</u>
Total	<u>400</u>

Ongoing Cleanup Actions

Ongoing REC-Supervised Site Cleanup Actions	28
Ongoing Priority Cleanup Actions Supervised by State Staff	<u>64</u>
Total	<u>92</u>

The Inactive Hazardous Sites Response Act requires annual reporting to the General Assembly. All of the reporting requirements specified under N.C.G.S. 130A-310.10 are met in this report. The status report on the Brownfields program, as required by N.C.G.S. 130A-310.40, will be provided separately.

I. THE INACTIVE HAZARDOUS WASTE SITES PRIORITY LIST

The Inactive Hazardous Sites Branch is housed in North Carolina's Department of Environment and Natural Resources' Division of Waste Management. It implements the Inactive Hazardous Sites Response Act of 1987. This act requires the branch to maintain a catalog of inactive hazardous substance or waste disposal sites. Table 1, on the following page, provides a list of sites added to that inventory. Table 2, also on the following page, provides a list of sites assigned "No Further Action" status since the last program report in November 2000. The entire inventory can be found in Appendix II. Figure 1, found on Page 3, shows how the inventory is distributed by category. Appendix I provides a description of each inventory category.

N.C.G.S. 130A-310.2 requires that sites catalogued in the Inactive Hazardous Sites Inventory be prioritized based on their threat to public health and the environment. After discovery, sites are first cataloged in the "Evaluations Pending" category of the Inactive Hazardous Sites Inventory until their rank is determined. Site rankings are determined using the rules found in 15A NCAC 13C .0200. Once ranked, sites are transferred to the Inactive Hazardous Waste Sites Priority List. This list is provided in Table 3, found on Page 4.

II. SITES THAT MAY OR ARE KNOWN TO REQUIRE USE OF THE INACTIVE HAZARDOUS SITES CLEANUP FUND

The Inactive Hazardous Sites Cleanup Fund is used to: (1) address imminent hazard sites; (2) pay for assessment and cleanup when responsible parties do not comply with orders to clean up sites; (3) pay for assessment and cleanup of sites without financially-viable responsible parties (orphan sites); and (4) pay for state-contracted survey and legal assistance necessary to prepare notices of Inactive Hazardous Substance or Waste Disposal Sites where owners do not comply with orders to conduct such work. The state must attempt to recover its expenditures from responsible parties in cases 1, 2 and 4.

The branch's Sites Priority List helps determine priorities for cleanup. Responsible parties for top priority sites are encouraged to voluntarily clean up their sites. When a responsible party does not comply with a request and subsequent order to clean up a site, the state must perform the cleanup using the Inactive Hazardous Sites Cleanup Fund. The demand for state funds to conduct site cleanups, also known as "remedial actions," depends on two factors. First, how often responsible parties refuse to comply with orders to conduct remedial action. Second, how often sites are without financially-viable responsible parties. To date, the program has been successful in encouraging voluntary actions by responsible parties. Funds are mainly needed for orphan cases.

The statute requires that the program report the list of sites known to require funds and the list of sites suspected to require funds for cleanup. Determining if responsible parties exist (and thus, if funds are needed) is often a complex and lengthy process. This information can become dated as owners and operators of the facilities change over time. Therefore, to operate as efficiently as possible with limited staff resources, responsible party research is not done until a site is next in priority for action. For this reason, the total number of orphan sites on the SPL requiring state funds is not presently known.

As of this writing, we have identified 26 orphaned chemical waste sites with attributes that make them a high priority. These attributes include current use as a residence or some other use with high exposure potential, and the existence of drinking water wells on or close to the disposal site. To estimate cleanup fund needs for orphan sites, we took the average cleanup cost of \$601,533 reported in a survey of state cleanup programs ("State and Territory Cleanup Accomplishments for the Period 1993-1997," prepared by the Association of State and Territorial Solid Waste Management Officials, December 1, 1998, pg. ES-9) and multiplied by the 26 known orphan sites. This estimate totals \$15,639,858.

Due to the frequency of old unlined landfills having hazardous substance contamination, the branch has also begun the task of evaluating these sites under the Inactive Hazardous Sites Program. As part of that effort, we attempted to estimate the number of old, orphaned, unlined landfills that may have priority attributes. We also attempted to estimate the funds needed to address these sites.

To date, we have completed field surveys of the old landfills in nine counties. Of the 53 landfills catalogued, 42 are considered priorities. This is due to either private wells, a surface water intake for drinking water, a residence, a school, a church, or a daycare on the property or within 1,000 feet of the landfill.

We can estimate the number of old, unlined landfills that pose the greatest hazard by using the following equation:

$$\frac{\text{No. of landfills w/exposure concerns (42)}}{\text{Total no. of landfills surveyed thus far (53)}} \times \text{Total no. of landfills in inventory (779)} = 617 \text{ landfills w/exposure concerns}$$

Almost without exception, these landfills were operated either by private individuals with limited financial ability or by counties and municipalities which operated in the public interest and did not make a profit. Thus, these sites may be considered to have no responsible parties available to pay for any corrective measures required. To avoid over estimation of the amount of funds needed to address the priority unlined landfills, we elected to use the value of known priority landfills (42) rather than the estimated number of priority landfills (617) or the total number of landfills (779) in determining cleanup funds needed. However, this estimation indicates the number of landfills requiring funds may be much higher.

By multiplying the number of landfills identified as priorities (42) and the average cost estimate for remedial action per site (\$601,533), a total expected remedial action cost of \$25,264,386 was reached. When the estimated cost for the orphaned chemical spill sites is added, the new total is \$40,904,244.

As of July 1, 2001, the balance of the Inactive Hazardous Sites Cleanup Fund totaled \$3,758,960. The fund has no sources of additional revenue outside of interest earned and fees for conducting no further action evaluations.

III. NATIONAL PRIORITIES LIST SITES REQUIRING A STATE COST SHARE

National Priorities List sites are those hazardous substance or waste disposal sites that are priorities for cleanup under the federal Comprehensive Environmental Response, Compensation and Liability Act more commonly known as Superfund. North Carolina currently has 26 NPL sites.

The NPL includes sites with and without financially-viable responsible parties. Cleanup costs are financed either by responsible parties or by a federal trust fund with a state cost share. When the federal trust fund is used, CERCLA requires North Carolina to pay 10 percent of the cleanup cost plus 100 percent of the cost to operate and maintain the remediation system.

Table 4, found on Page 51, Parts I and II provide a list of the North Carolina NPL sites, their locations, investigation/cleanup status, estimated costs, and projected start dates for cleanup. Part I, found on Page 51, includes those sites where the Federal Trust Fund/North Carolina cost share is required. Part II, found on Page 53, includes responsible party funded cleanups.

TABLE 4. NORTH CAROLINA NATIONAL PRIORITIES LIST (NPL) SITES

PART I - SITES WHERE FEDERAL TRUST FUND/NORTH CAROLINA COST SHARE IS REQUIRED

NPL SITES	CITY/COUNTY	OPERABLE UNIT	CLEANUP STATUS	ESTIMATED COST	PROJECTED CLEANUP START DATE

IV. RESPONSIBLE PARTY VOLUNTARY SITE REMEDIAL ACTION

Most often when the Inactive Hazardous Sites Branch solicits the cooperation of responsible parties in taking action at a priority site, those parties agree to voluntarily conduct a cleanup with branch approval. In addition to these voluntary actions, responsible parties and owners often come forward on their own to initiate an approved assessment and/or remedial action. Due to the number of volunteers and very limited staff resources, the branch was authorized by the General Assembly to privatize its oversight role at lower priority voluntary site remedial actions. Sites with more severe public health threats or concerns are still reviewed by state staff.

The privatized portion of the voluntary cleanup program is called the Registered Environmental Consultant or REC Program. Under this program, a responsible party hires an REC to both conduct, and to certify the regulatory compliance of, the site assessment and clean up. This certification replaces state oversight. The state audits a portion of the REC projects to ensure the integrity of the program and sanctions RECs where necessary. In order for a firm to qualify as an REC, it must demonstrate it meets certain regulatory qualifications criteria.

A current list of sites which have parties conducting assessments and cleanups in accordance with consent agreements with the state is provided in Table 5, on the following page. Table 6, found on Page 57, is a list of additional ongoing Branch-directed priority actions not under consent agreements.

V. IMMINENT HAZARD SITES

The NC Department of Environment and Natural Resources and the USEPA are committed to addressing imminent hazard sites when identified. Table 7 provides a list of sites where imminent hazards have been discovered, or where abatement activities have continued, since November of 2000 (last legislative report). Their location, a site description, status and funding source are also provided.

TABLE 7. SUMMARY OF IMMINENT HAZARD SITES

Site	City/County	Site Description	Status	Funding Source
American Elements CON	Farmville/ Pitt	Numerous drums and a tank containing acids present at facility refusing to take action to stabilize the waste.	The USEPA is stabilizing and removing the acids.	USEPA
Barber Orchard CON	Waynesville/ Haywood	Residential property soils and drinking water contaminated by a former apple orchard operation.	The USEPA removed some contaminated soils in 2000. An alternate water supply has been provided to residences with contaminated wells. Site will be evaluated further as a federal NPL site.	USEPA
Bufkin Store CON	Tabor City/ Columbus	Highly elevated lead concentrations in soil at store property. Contamination is from battery waste disposal.	The USEPA removed contaminated soils. Soil testing confirms removal is complete.	USEPA
Guyton Battery CON	Chadbourne/ Columbus	Highly contaminated soils on residential property due to a former battery cracking operation.	The USEPA completed removing contaminated soils in late 2000. Some contaminated soils remain below the USEPA emergency target levels.	USEPA
Holms Scrap Yard NEW	East Spencer/ Rowan	Abandoned source of radium 226 found at scrap yard.	USEPA is arranging for removal and proper disposal	USEPA
Northeast Chemical (Flowers Property) CON	Wilmington/ New Hanover	Elevated arsenic in soils on residential property	The USEPA removed the hot spots of soil contamination and constructing a retaining wall to prevent discharge of contaminants to river. Work completed in early 2001.	USEPA
Old Stake Road CON	Chadbourne/ Columbus	Residential property soils contaminated with lead from former battery waste disposal.	The USEPA completed a removal of contaminated soils. Some contamination remains.	USEPA

TABLE 7. SUMMARY OF IMMINENT HAZARD SITES (CONT.)

Site	City/County	Site Description	Status	Funding Source
Raeford Contaminated Wells CON	Raeford/ Hoke	Unexplained lead contamination in two wells five miles apart. May be natural source.	The USEPA is providing bottled water until city waste service is connected.	USEPA
Stallings Salvage CON	Monroe/ Union	Containers of various chemicals stored in a building that is in a state of near collapse.	The USEPA removed the containers and demolished the building. Work completed in 2000.	USEPA
Texfi Industries NEW	Fayetteville/ Cumberland	Chlorinated solvent groundwater contaminant plume has migrated from a former textile mill to the vicinity of a below ground drinking water holding tank on the City of Fayetteville's property.	The State constructed a barrier wall to prevent further contaminant migration to the holding tank area and installed extraction wells to remove contamination presently near the tank. Work continues.	State
VC Chemical NEW	Wadesboro/ Anson	Former fertilizer manufacturing operation. Very high levels of metals in soils. Property is near a residential area.	USEPA is supervising a site cleanup being conducted by Exxon/Mobil. Work continues.	Exxon/ Mobil
Vinegar Hill NEW	Tabor City/ Columbus	Highly elevated lead concentrations in soil on unsecured property across the street from residences, a small farmers market, and an ice cream shop. Contamination is from battery waste disposal.	The USEPA removed contaminated soils. Some soil contamination remains. Work completed in 2000.	USEPA
Woody's Salvage Yard NEW	Vander/	Site used as a salvage yard. Tanks, gas cylinders, drums and other wastes from a salvage yard were found on site. Asbestos present in an on-site building.	USEPA initiated an emergency action in early 2001. Work continues.	USEPA

CON - Continued action from previous reporting period

NEW - Initiated since last report

**VI. SUMMARY THE INACTIVE HAZARDOUS SITES CLEANUP FUND AND
NATIONAL PRIORITIES LIST COST SHARE FUND
AS OF JUNE 30, 2001**

Inactive Hazardous Sites Cleanup Fund

Deposits

Interest	\$163,379
Cost recovery of previous expenditures	\$8,047
No further action evaluation fees	<u>\$260</u>
Total Deposits	\$171,686

Withdrawals

Emergency action (Texfi Industries-Fayetteville)	\$187,770
Voluntary cleanup incentive (Gresham's Lake)	\$50,000
Bankruptcy case expenses (Holding Pond for Scrubber Waste - Greensboro)	<u>\$506</u>
Total Withdrawals	\$238,276

Current Balance **\$3,758,960**

Orphan Cleanup Cost Requirements *(see Chapter II for more details)*

Anticipated cleanup cost for 26 priority orphan sites	\$15,639,858
Anticipated cleanup cost for 42 priority unlined landfills	<u>\$25,264,386</u>
Total Orphan Cleanup Cost Requirements	\$40,904,244

National Priorities List Cost Share Fund

NC Cost Share Fund Income

Appropriation, interest, and other income \$11,096,504

Note: An additional \$198,000 set aside for remediation of the two FCX sites in NC came from the final FCX bankruptcy settlement. These funds are not included in the fund income.

Total Fund Income **\$11,096,504**

NC Cost Share Fund Expenditures

Disbursed funds for NPL site cost share obligations \$2,904,155

Encumbered funds for NPL site cost share obligations \$4,675,933

Funds disbursed or encumbered for other NPL cost share obligations \$1,496,966

Total Fund Disbursements and Encumbrances **\$9,077,054**

NC Cost Share Fund Remaining Amount Available **\$2,019,450**

NC Cost Share Fund Estimated Obligations

The estimated total cost of pending fund-lead NPL site cleanups in North Carolina is \$91,783,674. Therefore, North Carolina's 10% share obligation of the total cost of fund-lead NPL cleanup is \$9,178,367

The estimated additional North Carolina obligation for a new fund-lead NPL site to be added within the next 12 months is \$1,000,000

The estimated North Carolina obligation for operation and maintenance expenses for existing fund-lead NPL sites is \$20,000,000

Total Estimated Current Obligations **\$30,178,367**

Note: There is currently enough money in the Fund to meet the State's present cost share obligation. However, virtually no funds remain to pay for the State's operation and maintenance obligations which will begin in the next few years. Aside from interest, the Fund has no continuing source of income.

APPENDIX I

INACTIVE HAZARDOUS SITES INVENTORY Description of Categories

The Department of Environment and Natural Resources is required by North Carolina General Statute 130A-310.1(a) to maintain an inventory of inactive hazardous substance or waste disposal sites. The Inactive Hazardous Sites Inventory accounts for all of the sites in the EPA's Comprehensive Environmental Response, Compensation and Liability Act inventory of potential contaminated sites (CERCLIS). The intent is to address those sites determined not to be federal priorities. Many sites in the CERCLIS inventory, and therefore also the Inactive Hazardous Sites Inventory, are regulated by other state and federal laws. Thus, they are not priorities for the Inactive Hazardous Sites Program. The Inactive Hazardous Sites Inventory is organized in the categories described below. To avoid duplication of work, sites being addressed by other agencies are tracked separately in "exempt" categories.

- 1. Sites Priority List (SPL)**
The SPL includes sites with confirmed contamination or known disposal of hazardous substances that have been ranked using the Prioritization System rules (15A NCAC Subchapter 13C .0200).
- 2. Responsible Party Voluntary Remedial Action Sites**
In accordance with North Carolina General Statute 130A-310.9(b), voluntary cleanups or "remedial actions" conducted by responsible parties under agreements with the state must be listed in a separate category.
- 3. Sites with Evaluations Pending**
This category includes those sites that require evaluation before site priority can be determined. Each site with evidence of contamination will be ranked and transferred to the SPL. Those sites where no further action is required will be transferred to that category.
- 4. National Priorities List (NPL)**
The NPL consists of sites the federal government has determined to be the most serious, uncontrolled hazardous waste disposal sites in the nation. Either federal and state dollars or responsible parties will fund these cleanups. This list only includes North Carolina NPL sites.
- 5. Non-NPL Federal Superfund Cleanups**
NPL-caliber sites where the USEPA has entered into agreements with responsible parties to conduct remedial action are supervised by the USEPA. This list includes only the USEPA Non-NPL remedial action sites located in North Carolina.

6. **Inventory Sites Managed as TSD Facilities by the Hazardous Waste Section ***
Facilities that have or are in the process of applying for a Resource Conservation and Recovery Act permit to treat, store or dispose of hazardous waste are tracked in this category. These sites are exempt pursuant to G.S. 130A-310(3).
7. **Non-TSD Inventory Sites Under the Jurisdiction of the Hazardous Waste Section ***
The inventory includes some sites that are currently undergoing Resource Conservation and Recovery Act corrective action under the direction of the North Carolina Hazardous Waste Section, but do not hold RCRA permits.
8. **Inventory Sites Under the Jurisdiction of the Solid Waste Section***
Permitted solid waste landfills being monitored and controlled by the North Carolina Solid Waste Section are tracked in this category.
9. **Inventory Sites Under the Jurisdiction of the Division of Water Quality ***
Sites in this category include those where the North Carolina Division of Water Quality has been specified as the lead agency to oversee assessment and/or cleanup.
10. **Inventory Sites Under the Jurisdiction of the Division of Radiation Protection ***
Sites conducting assessment and cleanup under the direction of the North Carolina Division of Radiation Protection are tracked in this category.

* Note: Additional sites, not included in the Inactive Hazardous Sites Inventory, may be managed by these regulatory agencies.
